

Transportation Services

Our custom fleet is built to pick up, transport and deliver business technology

Protecting your investment in business technology begins with transportation. Data Sales Co. serves the lower 48 contiguous states, providing inside pickup and delivery, on-site palletizing, serial number audits, and de-installation services.

We own and operate our own fleet of trucks that are customized to transport sensitive electronic equipment safely and securely. Our drivers have extensive training and years of experience handling computer hardware. Data Sales Co.'s Transportation Services offers you the most reliable way to minimize risk and safely move your business technology.

- **Each truck is equipped with GPS satellite tracking, lift gates, pads, straps, floor covering, pallet jacks, dollies and lock boxes to secure hard drives containing sensitive information**
- **Trailers are equipped with air ride suspension to provide a smoother ride, further minimizing the risk of damage**
- **Drivers are trained to safely de-install business technology equipment, including rack-mounted servers, mainframe computers, disk arrays and tape silos**
- **Services include inside pickup and delivery, on-site palletizing, serial number audits, hard drive pickup and destruction, and recycling**
- **Our custom fleet serves all of the 48 contiguous states**
